

Plastic Awareness Programme- 31.7.2024

On July 31, 2024, the Chemistry Department's initiative in Attuvampati Village, Kodaikanal, focused on combating the pervasive issue of plastic pollution. The program went beyond simple awareness, incorporating practical demonstrations of plastic waste segregation and the creation of eco-bricks as sustainable alternatives. Students delivered presentations detailing the environmental hazards of single-use plastics, emphasizing their impact on local ecosystems and water sources within the Kodaikanal region. Interactive sessions allowed villagers to share their experiences and challenges related to plastic waste management.
